# Examinations

**"Our process combines a rare mix of people, experience, technology and best practice to deliver results you can rely on, every time."**

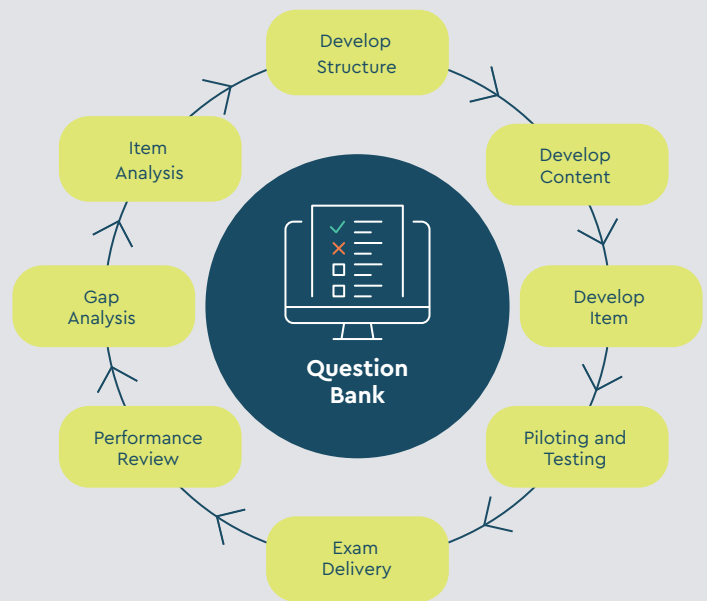

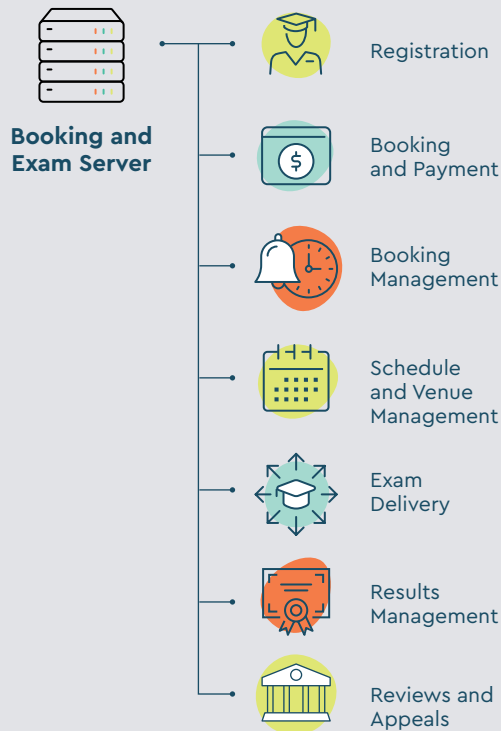

Aspeq provides world-class examination services that are secure and reliable. A complete, tailored, digital solution from registration to results.

## Benefits for regulatory authorities

- › High-quality reporting for enhanced oversight and control.
- › Promote your sector and organisation's standards through our question banks.
- › Ongoing performance monitoring of questions and examinations ensure standards are met.
- › Feedback to candidates and trainers to identify areas for potential improvement.
- › Reduced administration through automation and better control of examination services.
- › Dedicated customer service staff available to assist candidate examination queries.
- › ISO 9001 certified (Quality Management System)
- › ISO 27001 certified (Information Security Management System)

## Benefits for candidates

- › User-friendly exam booking and sitting interface.
- › Candidates can book and sit exams when they like.
- › Network of examination centres allowing candidates to sit examinations in a venue closer to work or home.
- › Immediate results so candidates can continue to train or apply for their licences and/or registrations.

**"Our high stakes exam services help to ensure candidates meet your organisation's exacting standards."**

### How Examinations work

Our high stakes exam services help to ensure candidates meet your organisation's exacting standards. We develop rigorous online tests for regulatory and awarding organisations in high stakes environments. Exams can be delivered in one of many secure and supervised exam venues throughout the world. We work with our clients to develop question banks that are tested, validated, and monitored for validity and reliability. We can integrate your questions into our systems or help you develop new content. Our question bank specialists understand and respect the sensitivities of content ownership, control and security.
